EZI VUE PRISMATIC SPECTACLES FOR LOW VISION

When low vision patients can no longer receive the benefit from the standard addition powers of bifocals or progressive lenses then EZI VUE prismatic spectacles become the next level of support to achieve reading and near vision assistance. These prismatic spectacles have the distinct advantage of allowing the user to read hands free of other any magnifying aid.

- High quality Euro style prismatic spectacles in acetate frame with acrylic lenses made to the highest standards of optical quality
- Fully coated lenses for scratch resistance and enhanced light transmission
- Five powers, range that will cover most needs
- Flexible frames for durability
- Long spring hinge temples for wearing down the nose if necessary
- Metal pad arms for correct fitting, adjusting and comfort
- Screw-on pads for easy replacement
- Practice trial kit available
